MONORAIL

+30 Screens

Project overview

The Monorail is set to develop a comprehensive mobile application that offers real-time updates, live tracking, and ticket booking services for the Monorail Egypt system, aimed at enhancing user experience and promoting efficient transportation.

Problem Statement

With the introduction of the Egyptian Monorail, a key challenge was ensuring that users can seamlessly navigate the new transportation system. Common pain points for users included:

Solutions

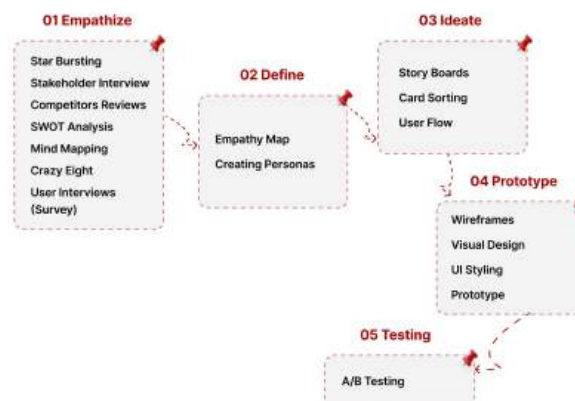

- **Interactive Route Navigation:** Implement a map feature to help users easily find stations and plan their routes.
- **Real-Time Information:** Provide live updates on train schedules, delays, and disruptions, with notifications for changes.
- **Digital Ticket Purchasing:** Enable users to buy tickets through the app, generating QR codes for quick station entry and reducing wait times.
- **Accessibility:** Design the app with features like large text, high-contrast visuals.
- **User-Friendly Interface:** Ensure a simple, intuitive design for easy navigation and access to essential features like ticket buying and route planning.
- **Personalized Account Features:** Allow users to create accounts to save the user payment information.

Stakeholder interviews

- What is the main goal of the app?
- Who is the primary target audience?
- Which features are essential for the app?
- How do you plan to generate revenue?
- How do you want to gather feedback from users?
- What type of feedback options should the app support?
- Which existing tools or frameworks do you prefer?
- How should we approach accessibility for different users?
- What is your vision for the app's design and user interface?
- How often should data from stakeholders, design, and user interface?
- Should the app work offline or require constant internet connectivity?
- Do you have any specific design preferences or guidelines?
- What payment methods do you think should be integrated into the app for ticket purchases?
- What timeline do you envision for the development and launch of the mobile application?

Competitive Analysis

	Monorail App	Cairo Metro	Egypt Trains	Egypt National Railways
Real-Time Navigation	Yes	Yes	Yes	Yes
Seamless Integration	Yes	Yes	Yes	Yes
Multi-Modal Transportation	Yes	Yes	Yes	Yes
Language	Arabic	Arabic	Arabic	Arabic
User Interface	Simple, user-friendly	Simple, user-friendly	Simple, user-friendly	Simple, user-friendly
Real-Time Alerts	Yes	Yes	Yes	Yes
Integration with Other Services	Yes	Yes	Yes	Yes
Accessibility Features	Yes	Yes	Yes	Yes

Summary:

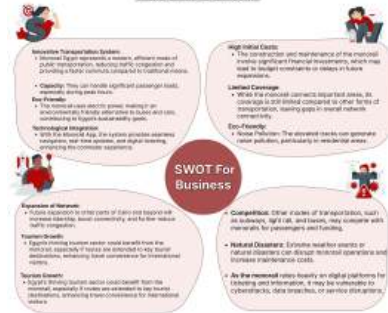

- Monorail App: Best for real-time navigation and booking for Monorail Egypt services.
- Egypt Trains: Ideal for nationwide train schedules and booking.
- Cairo Metro: Provides real-time navigation and information for the Cairo Metro system.
- Egypt National Railways: Offers real-time updates and booking for long-distance train travel.

Survey

1. What is your age?

2. What is your gender?

3. Familiarity with the monorail

4. How did you first hear about Egypt monorail?

5. How often do you use public transportation?

6. What is your primary mode of transportation currently?

7. What is the typical duration of your daily commute?

8. How important is it for the monorail to have accessible features for individuals with disabilities?

9. How satisfied are you with the public transportation booking system (metro and train)?

10. How important are the features of the Cairo Monorail now?

11. How likely are you to use the Cairo Monorail once it becomes operational?

What features would you like to see in the Cairo Monorail app?

What concerns do you have about using the Cairo Monorail?

Which payment methods would you prefer to use for booking?

On a scale of 1 to 10, how satisfied are you with current public transport experience in Cairo?

02 Define

User Persona

Ahmed Younes

Ahmed lives in a busy area in Cairo and works in the tech industry. He's tech-savvy, and accustomed to using apps for daily activities, including transportation. His primary modes of transportation are public transport (metro, buses) or ride-hailing services. Due to Cairo's crowded roads and inefficient transportation options, Ahmed often commutes long hours, affecting his work-life balance and leisure time.

Age	27
Status	Single
Education	B.Sc. in CS
Location	Cairo, Egypt
Occupation	the tech industry

Goals

- Seeks efficient, affordable, and fast transportation to avoid Cairo's traffic.
- Values reliable, real-time tracking and clear routes for timely arrivals.
- Prefers budget-friendly options over expensive alternatives like taxis.
- Appreciates eco-friendly transportation solutions due to environmental concerns.

Frustrations

- **Traffic congestion:** Frequent delays and unpredictable travel times due to heavy traffic in Cairo.
- **Inefficient public transport:** Long waiting times and overcrowded buses and metros, making his commute stressful and uncomfortable.
- **Booking difficulties:** Limited options for pre-booking public transport, leading to uncertainty about availability.
- **Unfamiliarity with new transport routes:** Concern about navigating the new Monorail system when it launches.

Technology Use

Tech-savvy, frequent users of smartphones, and apps like Uber, DiDi, and public transportation apps.

Empathy Map

Says

- "Public transportation is so unreliable and crowded, but it's the only affordable option."
- "I hope the Monorail system will be faster and more convenient."
- "I wish there was a better way to track my commute in real-time."
- "It's exhausting dealing with the delays every day."

Thinks

- "I spend way too much time commuting; it affects my work and personal life."
- "Will the Monorail system really solve the transportation problems in Cairo?"
- "If I can get real-time updates and avoid waiting around, I'll be much less stressed."
- "I need a more eco-friendly transport option, but it has to be affordable."

Does

- Frequently checks public schedules and alternative routes to avoid delays.
- Uses ride-hailing services during emergencies but avoids them during peak hours due to high costs.
- Compares transport options like buses, metro, and ride-hailing services for each trip.
- Actively searches for updates and news about the Cairo Monorail and how it might improve his commute.

Feels

- **Frustrated:** Ahmed feels frustrated with the current public transport system's delays and inefficiencies.
- **Anxious:** He's anxious about how reliable the Monorail system will be when it launches.
- **Hopeful:** He feels hopeful that the Monorail app will provide better transportation solutions.
- **Tired:** Ahmed feels mentally and physically exhausted by the overcrowded and unpredictable public transportation options.
